

Zaloe Madariaga

Full-stack web

I build web apps from start to finish: I design the database, build the API, write the logic and polish the interface down to the last pixel.

PROFILE

I enjoy full-stack because it lets me see the whole problem: thinking through tables and relationships, exposing data through a clean API and turning that into an interface people want to use.

In my final year of Web Application Development, with hands-on experience building full-stack projects (PHP + MySQL). I've built complete interfaces in vanilla JavaScript —no frameworks— to master the DOM, state and performance. I care about accessibility, responsive design and clean, maintainable code. I work in Spanish, Basque and English. Available for an internship.

TECH STACK

BACKEND

PHP REST API Sessions CRUD JSON

DATABASE

MySQL SQL Relational FK

FRONTEND

JavaScript ES6+ HTML5 CSS3 Responsive

DOM i18n

TOOLS

Git GitHub Figma VS Code TMDb API

// AT A GLANCE

Education

Profile

Junior full-stack

Backend

PHP · MySQL

Frontend

JS · HTML · CSS

Languages

ES · EU · EN

Mode

On-site · Hybrid · Remote

Availability

Available for an internship · junior

HOW I WORK

1. Understand — define the problem and who the app serves before writing code.

2. Model — database, relationships and API architecture.

3. Build — backend and frontend in iterations, clean and responsive code.

4. Polish — test, optimize and review the detail until it's a pleasure to use.

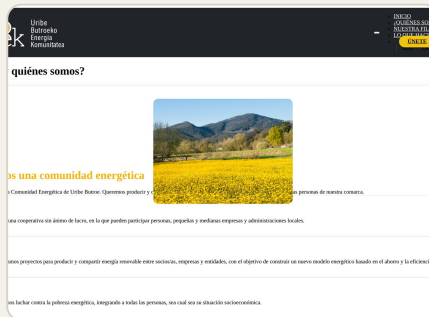

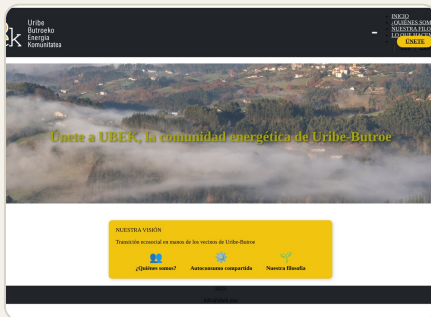

Selected projects

Four complete projects — each solves a concrete problem and is made to be used.

UBEK WEB · EU/ES

Website for the Uribe-Butroe energy community

Bilingual (EU/ES) institutional website for UBEK, the Uribe-Butroe energy community. It presents the cooperative project, explains shared self-consumption and lets people become members or donate.

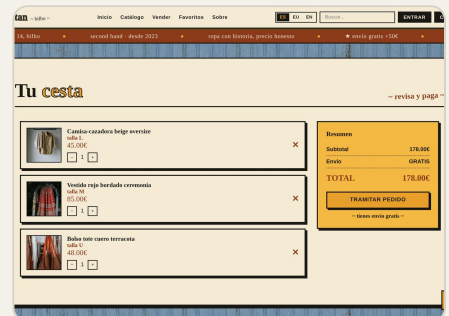

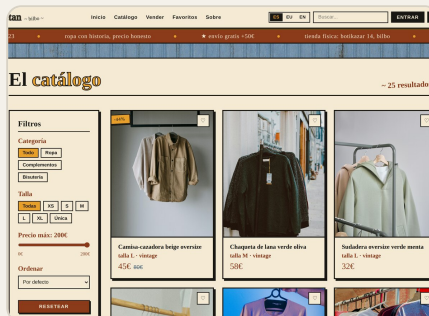

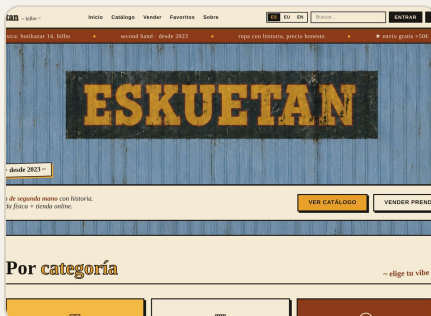

- › Full bilingual EU/ES site with language switching
- › Six pages: home, philosophy, who we are, projects, sign-up and donations
- › Forms handled with PHP
- › Reusable includes (header/footer) in JavaScript
- › Responsive, focused on attracting members

PHP · HTML5 · CSS3 · JavaScript · i18n

Eskuetan E-COMMERCE · ES/EU/EN

Second-hand clothing online store · Bilbo

A complete e-commerce for a vintage clothing shop in Bilbao. A 25-product catalogue with detail pages, cart, wishlist and checkout, in vanilla JavaScript and in three languages.

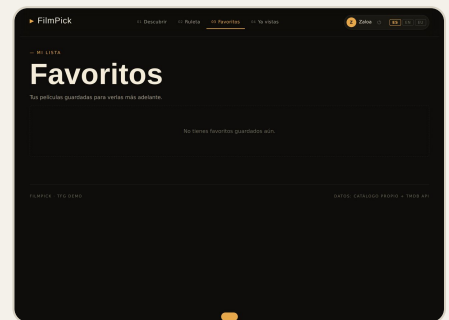

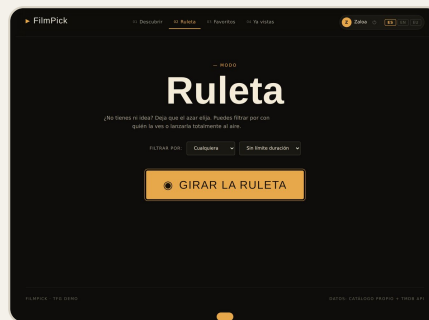

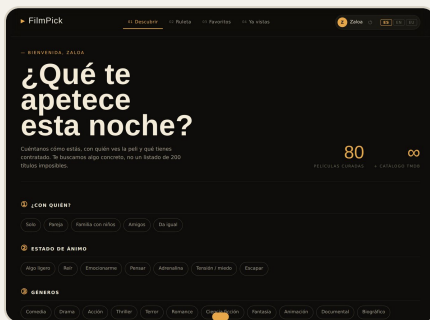

- › Full trilingual interface: ES · EU · EN (i18n)
- › Cart, persistent wishlist and checkout
- › Filters by category, size, price and live search
- › Product pages, featured items and favourites
- › Responsive with its own visual identity

JavaScript · HTML5 · CSS3 · localStorage

Movie recommender based on real criteria

An app that ends infinite scrolling: choose what to watch by who you're with, mood, genre, length and platform, ranked by compatibility. Combines a curated catalogue with the TMDB API.

- > Dual source: curated catalogue (80 films) + TMDB API
- > Compatibility ranking by filters matched
- > Favourites, watched list and 'roulette' mode
- > Share a film via link (?film=ID)
- > Pure vanilla JS, no dependencies, responsive

JavaScript · TMDB API · Fetch

Zugazti LANDING

Country house website in Gamiz-Fika, Bizkaia

A complete landing page with an editorial design approach: characterful typography, an organic palette and micro-animations. Built to convey calm and turn visits into bookings.

- > Editorial design with contrasting serif/sans type
- > Entrance animations and scroll effects
- > Full structure: hero, rooms, services, surroundings
- > Solid basic SEO and multilingual
- > Pure CSS, no heavy libraries, responsive

HTML5 · CSS3 · JavaScript · Responsive
